PROJECT PLANNING TOOL

Team id	PNT2022TMID46193
Project name	A Novel method for handwritten digit recognition system
Maximum marks	2 marks

Components	Uses
1.Jupyter notebook	It is Multilanguage collaborative computing interface that support more than 40 programming language
2.Tensor flow	Tensor flow helps create models for various application including natural language processing ,image recognition, handwriting identification.
3.Pandas	It is helpful for data analysis and manipulation task in data science. It has the flexible data structure
4.Numpy	Its acts one of the most important library in python it includes tools for writing and reading large data set from disc and it also enable memory based file mapping for i/o operation
